Experience

MediScan AI Seattle, WA
Software Engineer *Mar. 2025 – Pres.*

- **Second engineer hired**, joined at 16
- Built and owned MediChat, the AI agent that answers questions about a case and acts on it, with citations
- Built MediViews, the report preset system that lets each customer define their own report layout
- Rebuilt the case library with custom columns, grouping, filtering, bulk actions, and search
- Built full text search across every page of a case with highlights in the PDF viewer
- Rewrote the deduplication algorithm for case pages and built an eval harness to measure it on real cases
- Built the batch upload and custom export workflow for the largest customer
- Led the full app UI overhaul working with the company's designer
- Worked directly with sales, customers, and vendors to ship fixes and features
- Handled on-call and customer incidents, and wrote the team's runbook for stuck files

Discoverist Seattle, WA
Software Engineer *Jul. 2023 – Aug. 2024*

- **Techstars Seattle 2023**
- Built text and image search over product catalogs with budget, gender, and product type filters
- Built the shopping assistant for the homepage and product pages
- Built real time outfit and bundle recommendations
- Built bundle image generation and catalog enrichment from product images
- Replaced Algolia and Stylitics at stores with faster, cheaper, real time results
- **Deployed to live stores** for Hampton Sun, Steve Madden (South Africa), Sèchey, Fox and Robin, Ramy Brook, and Pet Supermarket

Projects

Budda AI: An agentic design tool for Figma built on the native plugin API, with around 8 paying users.
Sumany AI: Summarize documents using open weight transformer models, before ChatGPT in 2022.
Codecall: Programmatic tool calling for agents, 75% fewer tokens than normal tool calls in the demo.
Rune: A CLI and React component library that turns video into ASCII animations.
Awsm: A vim style TUI for AWS.
Komplete: A shell assistant that turns plain English into commands and adds ghost text autocomplete.
MusicGen fine-tune: Fine-tuned Meta's MusicGen on around 1,000 hip hop beats with LoRA on A100s.
